

Our "PLAN"

Alyssa What is MilkyWay3D.org, and why now?

We have new kinds of 6D info about ISM/star formation that we DID NOT HAVE 5 years ago

Ralf Radcliffe Wave is oscillating

Andi Non-equilibrium features in the ISM-how does this happen?

Catherine What is NEXT??

“Everything, Everywhere, All at Once”

“Everything, Everywhere, All at Once”

“Everything, Everywhere, All at Once”

1. molecular clouds *“form”*
2. new stars *form* in “molecular clouds”
3. stars *move* while and after they form
4. clouds *“evolve”* (grow, shrink, merge, change shape, change density) over time
5. winds & explosions from stars (called “feedback”) *cause* some of the clouds’ evolution
6. the most “significant” feedback events can *cause* new molecular clouds to form (see #1!)

Nothing stays still. Nothing lasts forever.

MILKYWAY3D.org

Welcome to a new view of the Milky Way... in 3D!

MilkyWay3D.org is an open-data open-source discovery hub, providing data, visualization, and research tools for studying the MilkyWay in 3D.

INFRASTRUCTURE ←

SCIENCE ←

→ EDUCATION & OUTREACH

assembling data as a community,
using modern, open-source practices

linking position and motion across dimensions,
using the plug-in architecture enabled by glue
(plug-ins include WorldWide Telescope, OpenSpace & more)

making data accessible online for decades

Lead: Alyssa Goodman, CfA

enabling studies of how galaxies turn
gas into stars, using...

topology, positions & motions of (long) features

details on star-forming regions...and more!

Lead: Catherine Zucker, CfA

connecting real research data,
software, and science to learners

real-time data exploration
anywhere, including in planetaria

“Cosmic Data Stories”
teach data science using
astronomical data & tools

Lead: Jackie Faherty, AMNH

TEAM: Harvard/Smithsonian CfA (Jonathan Carifio, Alyssa Goodman, Ralf Konietzka, Theo O'Neill, Patricia Udomprasert, Catherine Zucker), AMNH (Brian Abbott, Micah Acinapura, Carter Emmart, Jackie Faherty); Linköping University (Alex Bock); University of Vienna (Joao Alves, Sebastian Rattenböck); glue solutions, inc./Aperio (Thomas Robitaille); University of Wisconsin, Whitewater (Bob Benjamin), STScI/Johns Hopkins (Josh Peek), Max Planck IfA (Gordian Edenhofer); Northeastern University (Michelle Borkin); and YOU?!

Join us, contribute, and yes, you get a T-Shirt.

Our "PLAN"

Alyssa What is MilkyWay3D.org, and why now?

We have new kinds of 6D info about ISM/star formation that we DID NOT HAVE 5 years ago

Ralf Radcliffe Wave is oscillating

Andi Non-equilibrium features in the ISM-how does this happen?

Catherine What is NEXT??

Self-organisation at the edge of chaos

Self-organisation: Individual objects organise their joint behaviour by local interactions amongst themselves. No invisible hand is needed.

→ spontaneous global order

Emergent overarching structures and complex behaviours (swarm intelligence) appear that cannot be understood in isolation

Ant Hill

self consciousness

SIMCITY

*Is this Self-organised Complexity
at the Edge of Chaos*

Lee & PHANGS JWST

The Phantom Galaxy, M74

Initial condition: homogeneous gas disk

Uncorrelated Chaos (galaxies at cosmic dawn?)

Self-organised complexity emerges from the inside out

Emergent property: Constant global star formation rate

Self-organised statistic equilibrium

A super-bubble forms and travels through the disk

Are galaxies in a state of self-organised complexity
far from equilibrium?

Are our methods sophisticated
enough
to capture this complexity?

Large Photometric & Astrometric Surveys Make 3D Dust Mapping Possible

Cutout of DECaPS2: A 3 Billion Star Survey of the Southern Galactic Plane (Saydjari et al. 2023)

Comparing Dust Maps

Emission

Herschel/SPIRE

Wavelength: $500 \mu\text{m}$
Citation: Griffin et al. (2010)

Coverage: $\sim 2\%$
PSF FWHM: $36.6''$
Max Distance: --

DECaPS

Extinction

Wavelength: Optical-NIR-IR
Citation: Zucker/Saydjari/Speagle et al. (2024, in prep)

Coverage: 6.5%
PSF FWHM: $1'.07$
Distance: ~ 7 kpc

But wait, DECaPS is 3D!

Emission

Herschel/SPIRE

Wavelength: $500 \mu\text{m}$
Citation: Griffin et al. (2010)

Coverage: $\sim 2\%$
PSF FWHM: $36.6''$
Max Distance: --

Distance: 7.08 kpc

Extinction

Wavelength: Optical-NIR-IR
